ISI

Information Sciences Institute

ISI

- Reviews over 2,000 journal titles
- Selects around 10-12%
- Existing journal coverage in Thomson Reuters products is constantly under review.
- The journal selection process described here is applied to all journals in Web of Science, whether covered in Science Citation Index Expanded™, Social Sciences Citation Index®, or Arts & Humanities Citation Index®

ISI

Important Things to Know

Thomson Reuters needs:

1. A minimum of three (3) consecutive, current issues

Please do not send back issues

2. Provide a cover letter introducing your journal

ISI

Mentioned in Cover letter

- Full Journal Title
- ISSN
- Publisher's Name and Address
- Editor's Name and Address
- Brief statement on the unique features of the journal and how it is distinguished from other journals in the field.

ISI

How do I submit a journal for evaluation?

- Electronic Journal 
- Print Journal

Electronic Journal Submission Form - IP & Science - Thomson Reuters - Windows Internet Explorer

ISI

Print Journals

- Establish an ongoing, complimentary subscription to the title for Thomson Reuters,
- Send the most current issue of the journal,
- Forward each subsequent issue as soon as each is published to the following address:

Thomson Reuters
ATTN: Publication Processing
1500 Spring Garden Street
Fourth Floor
Philadelphia, PA 19130 USA

ISI

The Evaluation Process

- The ability to publish on time implies a healthy backlog of manuscripts essential for ongoing viability.

It is not acceptable for a journal to appear chronically late, weeks or months after its cover date

- Peer-review process
- Thomson Reuters focuses on journals that publish full text in English

The first selection criteria

- All content freely available.
- Registration: Free user registration online is acceptable.
- The journal must exercise peer-review or editorial quality control
- The journal should have an ISSN (International Standard Serial Number)
- Journals that report primary results of research or overviews of research results to a scholarly community
- Appearing at regular intervals, generally more frequently than annually

[Peginterferon alfa-2b plus ribavirin compared with interferon alfa-2b plus ribavirin for initial treatment of chronic hepatitis C: a randomised trial](#) [HTML] from thelancet.com
MP Manns, JG McHutchison, SC Gordon, VK Rustgi... - The Lancet, 2001 - Elsevier
BACKGROUND: A sustained virological response (SVR) rate of 41% has been achieved with interferon alfa-2b plus ribavirin therapy of chronic hepatitis C. In this randomised trial, peginterferon alfa-2b plus ribavirin was compared with interferon alfa-2b plus ribavirin. ...

Journal Selection for MEDLINE®

Indexing at NLM

MEDLINE

MEDLINE is the largest component of **PubMed**
National Library of Medicine (NLM®)

A distinctive feature of MEDLINE is

- The records are indexed with NLM's controlled vocabulary, the Medical Subject Headings (**MeSH®**).

MEDLINE

The National Library of Medicine (NLM) uses **an NIH-chartered committee, the Literature Selection Technical Review Committee (LSTRC)** → review all new biomedical and health journal titles → recommend those to be indexed for MEDLINE

MEDLINE

Electronic-only journals (see Additional Information Resources below)

- Quality, originality, and importance of the scientific content are primary considerations
- Once an electronic journal has been accessible for at least six months
- At least 20 articles have been published and made available online.
- Provide NLM with XML-tagged data of its bibliographic citations.
- Provide robust current access to all of its content.
- Have an acceptable arrangement for permanent preservation of, and access to, the content.
- They must be satisfied that you will submit all articles published in a digital archive
- Submit the bibliographic citation data electronically in XML format

MEDLINE

print journal title reviewed

MEDLINE Review Application Form

Submission of recent print issues

- ❖ Quantity required
 - If published three or more times a year four print issues are required.
 - If published twice a year or irregularly three print issues are required.
 - If published once a year two print issues are required.
- ❖ Send one copy of each issue
- ❖ Only published issues (**i.e., not "proofs", unbound issues, or photocopies**) are accepted for the review process.
- ❖ Following the receipt of the required number of recent issues, a complementary subscription was received up until the time of the scheduled review

MEDLINE

How often does LSTRC meet? How many titles are examined?

- The LSTRC meets three times a year. (fall, winter and late spring)
- About 190 titles, including new titles and re-reviews, are examined at each meeting.

MEDLINE

If the journal is not selected, what can be done?

- Rating scores range from 0 to 5.
- Currently, a title must receive a score ≥ 3.75
- The LSTRC does conduct re-examinations of journals upon request.
- After the first review, titles may be re-examined after a minimum of two years
- Following the first review date. After the second and subsequent reviews, titles may be re-examined after a minimum of three years following the prior review date.

MEDLINE

If a journal title is selected, when will indexing begin?

- Provide the journal's citation and abstract data as XML-tagged data to NLM  increases the public availability of the journal's citations and abstracts in PubMed
- electronic-only journals, the receipt of XML-tagged data is a **requirement**; **acceptable XML-tagged citation and abstract data must be received within six months following the date of inclusion in MEDLINE.**
- NLM acquires a subscription or license to the journal. Most journals are indexed from the online version; NLM will subscribe to and use the paper version for indexing if an electronic version is not available.
- License terms must not prohibit the NLM from crawling the journal web site with an automated program (web robot, crawler, spider, or similar devices)
